BESKRIVNING

In this world of abundant resources and huge wealth, hunger cannot be understood simply as a problem of food production. It is also a matter of human relations. Hunger grows out of widespread indifference and exploitation. The goal of ending hunger has been achieved in many places, including places where people have little money. In stable, strong communities, where people care about one another's well-being, no one goes hungry. That caring is strengthened when people work and play together. This insight tells us the direction we need to take to move toward a world without hunger. The problem of global hunger will be solved when we learn to live together well locally.
